New SIM2 Crystal 4 SH *Gold Series*

In the year that celebrates the 3 decades of excellence in projection, SIM2 is proud to present the projector that best represents these years of passion and obsessive attention to the quality of performance: the **CRYSTAL 4 SH GOLD SERIES**.

SIM2: 30 YEARS OF EXCELLENCE AND INNOVATION

The 30 years experience that has led SIM2 to innovate in many sectors of vision, from the studies on colorimetry to HDR (when this was only an embryonic idea) and to apply all the knowledge to the projection industry by designing unique products, has led us to present an object capable of keeping all the promises of excellence that we have developed over the years.

Home Cinema is, above all, a cultural business where the pleasure of viewing films and events in the most real way possible, immersing the viewers in the event itself, is combined with thrills and emotions that movies provide. But with the SIM2 GOLD SERIES projectors, the pleasure comes also from the awesome feeling of owning the best home cinema system and be proud of it

THE NEW CRYSTAL 4 SH GOLD SERIES

An extraordinary brightness accompanied by an equally extraordinary colorimetry and contrast with super-selected optics and the professional ability

to calibrate and adjust according to one's wish and ability (through a custom made SIM2 LCC 6.0 software) plus custom made production and a special set up by the factory (with simulation of the Customer's theater) make the CRYSTAL 4 SH GOLD SERIES an object for a few and selected users who want "everything" in a projector that really has it all in the elegance of its shape.

It is an object that can easily compete with 3 cinema projectors in terms of image quality without having the negative characteristics of the massive projector designed for theaters with 1000 or more seats.

This new model is a product at the top of the medium category in terms of price but by choice and necessity of SIM2 it is a product for the few: a few products that can be produced per year, which will only be put into production on order with a lead time which today is more than 60 days and which we hope will drop to less than 30 days by 2024.

The CRYSTAL 4 SH GOLD SERIES is a selected and numbered product which today cannot exceed 50 pcs/year and which, like NERO4S GOLD, represents the best of these 30 years of excellence.

Today the CRYSTAL 4 SH GOLD is born and it has a distinctive sign in its livery with the gold color but above all under the livery it has an extraordinary heart.
